# About

Simplifying Skills is a dynamic initiative aiming to improve the employability of young Indian engineers. It is helping to move India forward towards global competitiveness by enhancing the quality of human capital in the country.

It is one of our quantum innovation institutes that starts with figuring out where you want to be. It aims at promoting systemic changes to current teaching-learning paradigms in engineering education.

It is not a curriculum or degree that can help you get placed and grow. But if you are one of those individuals who believe in getting results along with skills and hard work then we have got you covered.

# Mission

Our mission is to equip engineering students with the best skills needed for professional success.

From the minute you choose us as your learning partner, you become a part of an innovative, passionate, and motivated community that is dedicated to helping you achieve your dreams.

# About Simplifying Skills Fellowship Program

Simplifying Skills Fellowship Program emphasizes project-based learning and is an internship based oriented program. Hands-on training via course projects, and an emphasis on "learning by doing", enable engineering students to solve challenging problems of the real world rather than be confined to books, blackboards and PowerPoints.

You will be able to apply to a large number of companies. Furthermore, there is no need to search for jobs on multiple websites. We are a platform that will help you find the job you desire according to your eligibility.

Our program enables you to find the route to success at the intersection of theory and practice, discover and implement innovative solutions to real-world problems.

# Compliance of mandatory Internships Policy by AICTE

Because of the current situation due to COVID-19, AICTE directs all its Approved Institutes to abide by all the social distancing guidelines and other measures promulgated by the Government of India and respective State Governments.

Institutes should instruct their students, NOT to take up any Internships outside the organisations which involves travel, contact with outsiders, etc., However, ongoing internships, where companies are allowing students to work from home, shall continue.

Internships help in creating conditions conducive to the quest for knowledge and its applicability in work. To positively engage students who are not able to get internships in the current situation of lockdown, all colleges/institutes should give challenging problems as internships to such students which can be worked upon by them from their respective homes.

AICTE has prepared a model curriculum with the help of prominent academicians of the country so that the country may produce competent employable graduates as per the needs of the industries. The model curriculum includes the internship for students of six months duration at different stages of the programme.

# Simplifying Skills groom fresh talent and prepare them for top jobs!

Join our Fellowship Program to get a sneak peek into the highlights of our various courses. Sharpen your skills to enhance your career. Type your text

With our advanced program along with the curriculum... you will be ready and empowered to co-create your future at Simplifying Skills

Embedded in curriculum and trained by dedicated faculty, the focus is on making the students industry-ready and proficient in various skills.

## Learning by doing

Simplifying Skills Fellowship Program curriculum is based on the framework of strategic competitiveness, which teaches the concepts of creativity, entrepreneurship, innovation, sustainability, leadership and incisive decision making. You will learn how to compete—and create transformative change—in your profession.

## You count with us.

**What defines you? Simplifying Skills believe it's YOU.**

And you are exactly what we invest in. You, and your interests, your talents, your goals. Simplifying Skills is where the YOU that you envision becomes a possible reality. It's where you get the instruction and the inspiration you need to chart your course, create your path, and define yourself.

# Graduate with a holistic skill set

One-on-one discussions with our professionals make the online classes interesting and interactive. The faculty is helpful and approachable at all times—even for the slightest of doubts. Our holistic educational approach is designed with an intensive focus to equip you with a total skill set comprising soft skills, communicative skills, an internship in cyber security, data science, machine designing and more. You will be equipped with both depth and breadth of knowledge. You will be transformed into a well-rounded individual, and become a valuable asset to your future employer and society at large.

## A rigorous, flexible curriculum

Prepares you to work in your dream company!

We understand students have to fit training around their work and personal lives. That's why we've developed a four-year training program so that you can find the best learning method that best suits your future career.

## FIRST-YEAR:

The valuable life skills not only ensure a student's success but also enhance and enrich their personality. Simplifying Skills Fellowship Program has been designed based on various dimensions which have been identified as indispensable by the professionals and are essential for the holistic progress of the student's personality and character. Every dimension is like a pillar that will help to develop a strong personality in the student.

# Curriculum Highlights

SOFT SKILLS TRAINING:	COMMUNICATION SKILLS:	APTITUDE:	DATA INTERPRETATION & LOGICAL REASONING:	VERBAL REASONING:
Interpersonal Communication	Emotional Intelligence	Number Systems	Caselets	Vocabulary Based (Synonyms/ Antonyms)
Presentation Skills	Active Listening Skills	LCM & HCF Profit,	Bar Graphs	Fill in the blanks
Email & Virtual Communication	Communicating Under Stress	Loss & Discount Percentages	Line Charts	Sentence Correction
Assertiveness	Storytelling	Speed. Time & Distance	Column Graphs	Cloze Passage
Working in Teams	Writing Engaging Content	Time & Work	Venn Diagrams	Jumbled Paragraph
Negotiation Skills	Articulation of Thought	Simple & Compound	Pie Chart	Meaning-Usage Match Analogies or Reverse
Leadership Management	Writing Winning Proposals	Interest Ratio & Proportion	Other Basic Reasoning Questions	Analogies
Art of Effective Pitching	Listening Skills	Averages	Calendars	Summary Questions
Mock Interview Prep-up	Reading Skills	Quadratic & Linear Equations	Number and Letter Series	Verbal Reasoning
CV Writing	Speaking Skills	Complex Numbers	Clocks	Facts-Inferences-Judgments Reading
Critical thinking	Thinking Skills	Logarithm	Venn Diagrams	Comprehension
Listening		Binomial Theorem	Cubes	
Adaptability		Sequences & Series	Seating Arrangement	
Organisation		Surds & Indices	Binary Logic	
Teamwork		Inequalities	Logical Matching	
Punctuality		Probability, Permutation and Combination	Logical Sequence	
		Set Theory	Syllogism	
		Functions & Geometry	Logical Connectives	
		Mixtures & Allegations	Blood Relations	
		Trigonometry Coordinate		

# You Will Learn

To identify different approaches to conflict in terms of interests, needs, rights, or power, and how to respond to each.

To recognize how skills like communication, empathy and active listening contribute to effective conflict prevention and resolution.

Techniques for how to respond in creative and positive ways to the minor conflicts you face while working in a company.

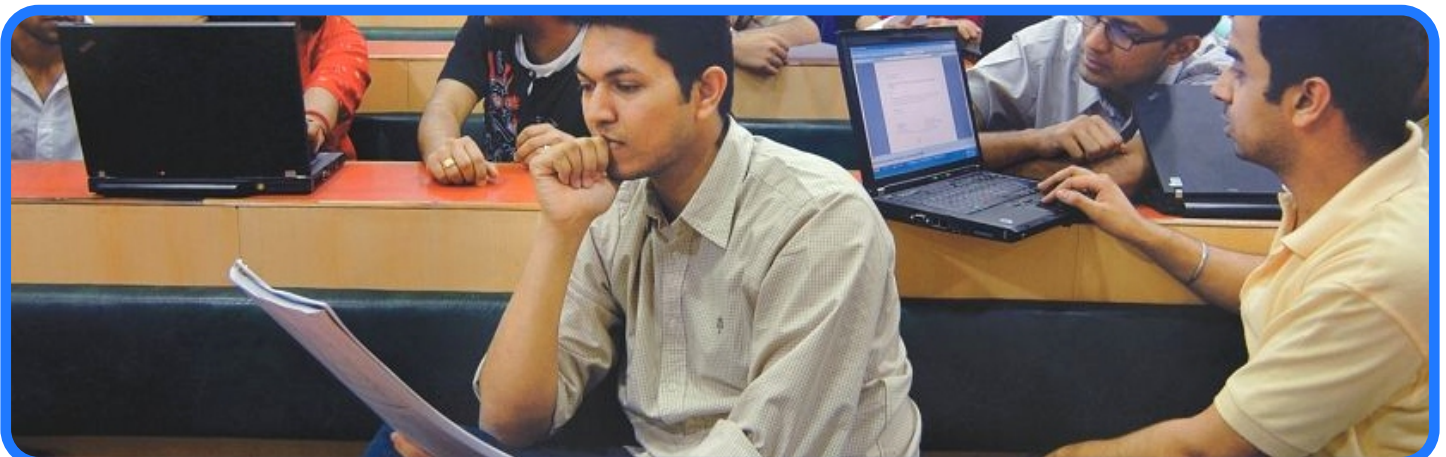

## SECOND-YEAR

Empowering and educating current and future technology practitioners around the world with knowledge and skills, through industry-leading community programs, resources, training, certifications and events.

The second-year curriculum is fully aligned with what is happening in the industry. Course materials are continuously updated based on new developments in technology.

## YOU WILL LEARN

- Work with various data generation sources
- Analyse structured and unstructured data using different tools and techniques
- Develop an understanding of Descriptive and Predictive Analytics
- Apply Data-driven, Machine Learning approaches for business decisions
- Build models for day-to-day applicability
- Perform Forecasting to take proactive business decisions
- Use Data Concepts to represent data for easy understanding

# Curriculum Highlights

Training in Basic Computers

Introduction to Computer Fundamentals

Internet

Cyber Security

Blockchain

Basics Programming Intro  
Languages of choices

Data Science

Linkedin

Profile Management on Social Media

C/C++/Python/etc

Advanced Programming

Languages of choices

Branch Related Domain Knowledge

Civil Branch Exposure

Mechanical Branch Exposure

Computer Science Branch Exposure

Career Exposure Branch wise

Functional Training and exposure to Finance

Functional Training and exposure to Telecom

Functional Training and exposure to Manufacturing

Functional Training and exposure to Social Media

Project Development Exposure

Entrepreneurship Exposure

How to start a startup

Funding Concepts

Exposure to Startup bubble

# Third-year

Simplifying Skills offers internships for engineering students, these internships are available in the Internet of Things (IoT), Cyber Security, Data Science, Machine Learning, Civil Engineering, Cloud Engineering and many more. Students from various engineering colleges across India join us for the internship program. Online internship for engineering students with a certificate, this program is an online program where a student can enrol for this online program and get certified.

This internship program helps students in gaining practical knowledge on both hardware and software modules. By being part of this internship students can get exposure to real-time projects with complete support from experienced trainers. If you are looking for practical exposure before a job, this program will be helpful.

## Internship Process

Take online training through our online training portal using your user id and password

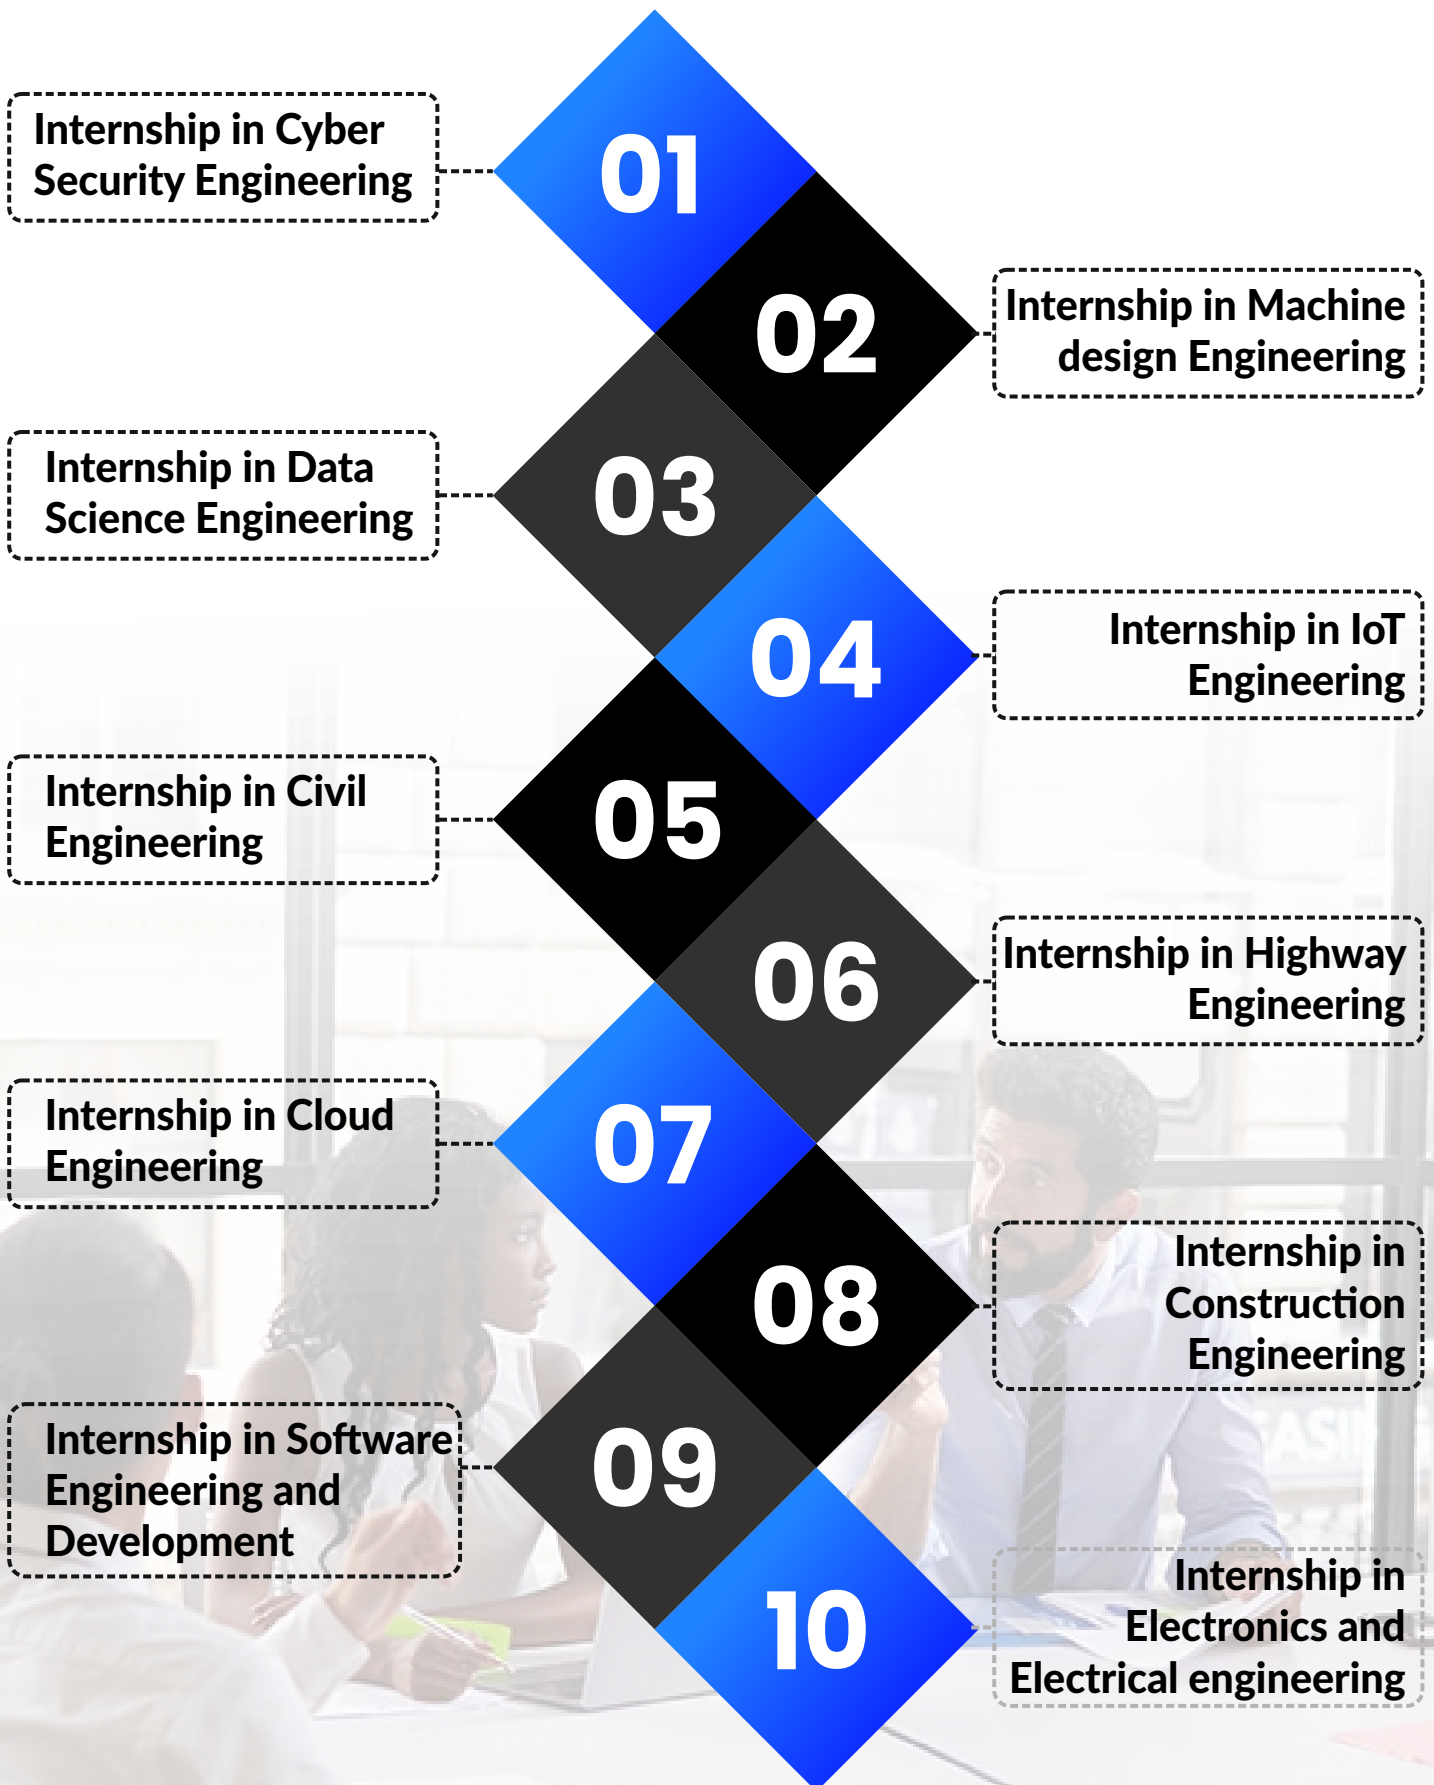

Get hands-on practice by doing assignments and projects

Take the final module test at the end of the program.

Congratulations!!! Your certificate will be ready and emailed to you on your registered email id. (Hardcopy of the certificate are sent by courier on request)

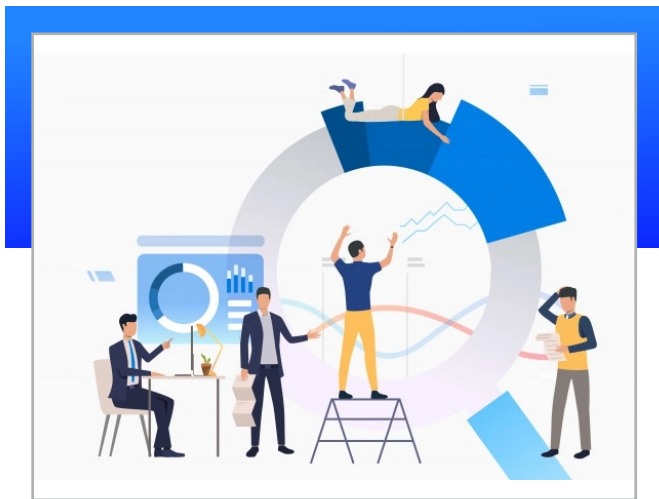

# Curriculum Highlights

# FINAL-YEAR

Campus Placements/ Campus Recruitment drives are conducted by Simplifying Skills for providing job opportunities to the students who are pursuing their particular academic programs. Campus Placements offer a student a wonderful opportunity to get placed during their academic pursuits and provide them with the comforts of a safe and secure future. Keeping in mind the importance of the campus placement programs, a student needs to prepare adequately for these programs and make sure that they put their best foot forward. Along with campus selection, project development is also part of the final year of third-year choice which is completed with the assistance of our professionals.

## Curriculum Highlights

**Project Development on  
Third Year choice**

**Campus Selection Process**

## Fellowship Program Benefits

- Gain valuable work experience
- Explore a career path
- Give yourself an edge in the job market
- Develop and refine new skills
- Network with other participants in the field
- Gain confidence
- Transition into a job
