Student Life Cycle Management

About Simplifying Skills

Simplifying Skills is a dynamic initiative aiming to improve the employability of young Indian engineers. It is helping to move India forward towards global competitiveness by enhancing the quality of human capital in the country.

It is one of our quantum innovation Institutes that starts with figuring out where you want to be. It aims at promoting systemic changes to current teaching-learning paradigms in engineering education.

It is not a curriculum or degree that can help you get placed and grow. But if you are one of those individuals who believe in getting results along with skills and hard work then we have got you covered.

Simplifying Skills Groom Fresh Talent And Prepare Them For Top Jobs!

Join our Bootcamp to get a sneak peek into the corporate based internships and skill development into various branches and streams. Sharpen your skills to enhance your career.

Your dream company awaits you!

Simplifying Skills maintains a close link with leading corporations and professional associations to deliver you an efficient working experience in your dream company.

Some of our leading industry collaborations are:

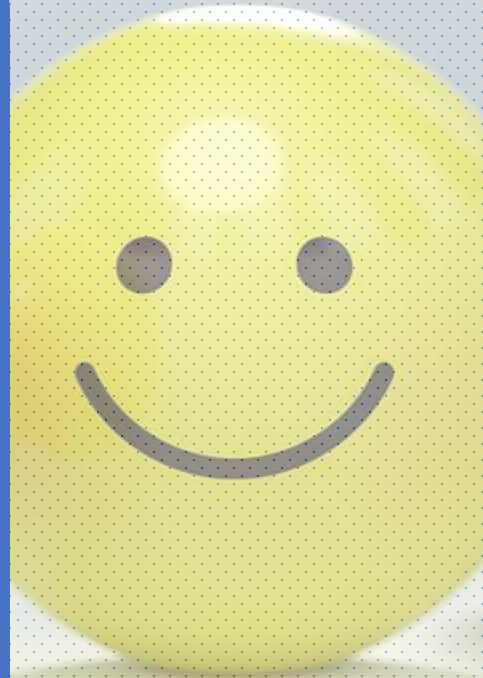

Testimonial

We invited simplifying skills in our college for industrial training and it was well organised and delivered. They even provided placement opportunities to our students.

They have profound knowledge about the latest corporate needs and their programs are very well versed with the same.

Pankaj Lahariya

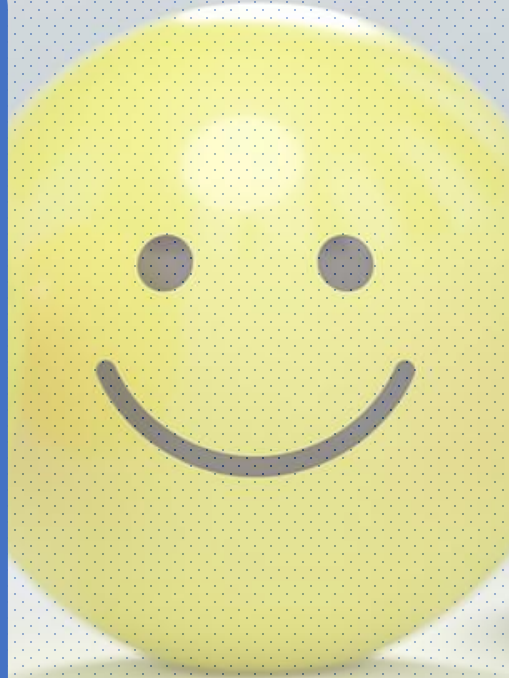

I have worked with the company for two years as our recruiter and it has been a great experience, I got to learn a lot of things there and my colleagues were cooperative.

Amandeep Sharma

Testimonial

Great place to work, a great place to grow. Managers are so supportive. Very nice workplace. I had a wonderful experience working with Simplifying Skills.

Utkarsh Upadhyay

Simplifying Skills is a very good institute for learning big data, Hadoop and data science. It has given very practical learning for each topic taught with a job-ready approach. Will recommend it to all who want to learn big data Hadoop and data science and get into this field.
