

Simplifying Skills FellowShip Program Frequently Asked Questions

What is Fellowship Program?

The Simplifying Skills Fellowship Program is an internship-oriented programme that promotes real time and project-based learning. Students may address real-world problems instead of being constrained to books, blackboards, and PowerPoints thanks to hands on training provided via travel, industry visits, course projects, and an emphasis on "learning by doing." You will get the opportunity to visit prominent institutes, development centres, and corporations, as well as apply to a significant number of businesses. Our curriculum helps you to develop and apply new solutions to real world challenges by bridging the gap between theory and practise.
